## DETAILED ACTION

***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/09/2007 has been entered.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11, 15-17, 20, 22, 25, 27, 32-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. Claim 11 is confused. It has a broader definition of A, B at the start of the claim and a narrow one in the last two lines. Which is intended.

For Y1 and Y2 of 16-C of claim 15, neither can be N. Similarly, Y2 in 2-B of claim 17 cannot be N, otherwise the 6-membered ring will not be aromatic.

2. In claim 25, None of Z1, Z2, Z3, Z4, Z5, Z6 can be O, S or NR1 in formula 10B.
3. In claims 16, 20, and 27 (12-A in claim 27), only one of Y3 and Y4 can be N, not both.

Likewise only one of Y2 and Y3 in claim 22 for 7-A.

4. Claim 32 depends on canceled claim 1. Dependency on claim 9 will fix this.
5. A slash appears in next to last line of claim 32's step e. Its meaning is unclear.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 9-11, 13-30, 32-34 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-20 of U.S. Patent No. 7018997. Although the conflicting claims are not identical, they are not patentably distinct from each other because there is no patentable distinction between the compounds as claimed in the patent, and the method of synthesis, as claimed here. See *Mosler Safe & Lock Co. v. Mosler, Bahmann & Co.*, 127 U.S. 354, 218 S.Ct. 1148 (1888) [the first patent was of an article; the second patent, held invalid, was for a method of making it]. See also *Ex parte MacAdams*, 206 USPQ 445 [The patent had a composition of matter; the application had the method of use].

Note that no restriction was made in the prosecution of 7018997 between these compounds and their method of synthesis.

***Information Disclosure Statement***

The three Chilean patents were struck from the IDS. Complete copies were not provided; the front sheets may have been removed. The examiner cannot determine whether these were the actual documents or not. One has handwritten "15382"; a second is stamped 34812. A third is stamped 36649. None of these numbers appears on the IDS. The country code does not appear on the documents either.
